

Since I pay for a subscription to satellite radio, I do not understand how the FCC can limit its broadcast, anymore than my satellite TV or cable TV can be limited. We are paying for the subscription and have certain rights and it should not be up to a group of people to dictate--especially something as simple as traffic and weather!!!

Satellite radio provides a variety that we're not getting from local or national broadcasters, just as satellite and cable TV offer variety that the local channels do not! Remember when CNN and the Weather Channel started? No one thought it would bring value--but it did and still does! This kind of competition is what America's system of free enterprise is all about!

Please reject NAB's petition 04-160 and support XM's kind of programming.

Thank you, Joan Buckner
